HP DL380p G8 End of Product Sale (EOPS) Notice

Key Takeaway

Sonus Networks announces the End of Product Sale of HP DL380p G8 HW platform. The products affected include bare-metal PSX, DSI, EMS, NetScore and ASX.

Sonus has already virtualized EMS, PSX, NetScore and DSI since SW Release 9.3, allowing customers to deploy these applications on COTS Hardware. Sonus virtualized solution portfolio provides the ability to scale across communication networks in an elastic manner as demands grow and ebb. The NFV model also adds flexibility, allowing service providers to launch, improve, and incrementally optimize services using software updates rather than wholesale hardware replacement. This would allow Sonus' customers to enable solutions that would accelerate deployment of new services and increase revenue, while at the same time optimizing utilization and efficiency.

Sonus looks forward to discussing how this announcement applies to your existing and planned network deployments with Sonus.

Please contact your Sonus sales representative to discuss various network deployment/ migration options.

Sonus Product Life Cycle Dates:

Milestone	Date
End of Product Sale Announcement: Date on which Sonus has announced EOPS	15-Dec-2016
Last Order Date: Date on which the affected products are no longer orderable	1-June-2017
Last Ship Date/Manufacturer's Discontinuance: Date on which the products can no longer be shipped from Sonus	31-August-2017
End of Support Life: Date in which the product can no longer be supported by Sonus—calls to Sonus level 1 no longer supported, no RMA.	31-August-2022

FAQs

Frequently Asked Questions	Answer
Is this an exhaustive list of HP G8 based SKUs that are End of Product Sale?	Earlier this year, we declared EOPS for Trunking SW Release 8.x (and additionally SW R9.x for SGX). HW and SW bundle SKUs containing HP G8's are already under EOL due to these notifications and are not mentioned here to avoid confusion. Please refer to above mentioned notices here: 1. http://www.sonus.net/sites/default/files/external_eops_announcement_trunking_sw_r8_x_x.docx 2. http://www.sonus.net/sites/default/files/sonus_external_eops_announcement_sgx_sw_9.0.x_and_8.2.x.docx
Would Sonus be qualifying another HW platform or would there be a replacement HW platform for HP G8?	Sonus would only be supporting and deploying virtualized PSX, EMS, DSI and NetScore (aka PSX SWe, EMS SWe, DSI SWe and NSCR SWe) post general availability of HP G8 platform. Please reach out to your sales representative to understand how NFV based applications would meet your requirements.
